

In Reception we are continually trying to develop our environment for the children. We are particularly focused on developing our outdoor provision at the moment. In Reception children have continuous access to the outdoors each day, this means our outdoor learning is just as important as what takes place in the classroom.

We are currently looking at developing a garden area for the children to make the environment feel more like what they would see in a garden instead of just tarmac. To make this possible we are looking for donations of bark and plants. Ideally we would like plants like ferns, bamboo and grasses or anything else that is hardy enough to withstand play. If you have any spare plants lying around or if you are a keen gardener and grow your own, please do bear us in mind.

I have attached some photographs of what we are hoping to achieve to provide a better idea of what we would like to provide for the children.

Many thanks

Mrs Slack
